ABOUT ME

I'm a web developer from Woking, Surrey. I've been coding since 2016, primarily working with industry standard front-end technologies - although I also have supplementary back-end experience.

I previously worked at a digital marketing agency in Guildford as the senior member of a small web team, before returning to my former job following redundancy. I've enjoyed the stability of this role throughout the uncertainty of the pandemic, while continuing to expand my technical skillset through personal projects and educational courses in preparation for the next step in my development career.
